

# PEAK-BAGGING ON THE AT

The three lists recognized and regulated by the Appalachian Mountain Club (AMC) are color-coded as follows:

- **Green: 4,000-foot peaks of the White Mountains.** 14 out of 48 peaks are directly on the AT and 9 more are on spur trails.
- **Green & Purple: 4,000-foot peaks of New England.** 20 out of 67 peaks are directly on the AT and 14 more are on spur trails.
- **All Colors: One Hundred Highest peaks of New England.** 25 out of 100 are directly on the AT and 14 more are on spur trails.

Peak locations on the AT are based signs I encountered while thru-hiking in 2014, the *2014 Northbound A.T. Guide* by David "Awol" Miller, and a few entries on <http://www.summitpost.org/>. Check signs and your guidebook carefully, as the trail may be re-routed.

There is also a special recognition for all-winter summits.

For more information, visit <http://www.amc4000footer.org>.

Peak	Location	Elevation (ft.)	AT NoBo mile mark (side trail)	White Mtn. 4,000-footers	New Eng. 4,000-footers	Hundred Highest	Date Completed
Washington, Mt	Sargent's Purchase, NH	6,288	1852.4
